Graduates looking to kickstart their careers in project management with a strong foundation in essential methodologies and hands-on experience with industry-leading tools.

Career **outcomes**

Project Management Prodegree™ in collaboration with KPMG in India equips you with the expertise and tools required to excel in project-driven roles across industries. Whether you aspire to lead large-scale projects, drive operational efficiency, or manage cross-functional teams, this program prepares you for high-impact roles in today's dynamic business landscape.

Project Manager	Scrum Master
Agile Project Manager	Business Analyst
Program Manager	Operations Manager
Project Coordinator	PMO Analyst
Risk Manager	Consultant (Project Management)

Program curriculum

Project Management Fundamentals

Cast Study: Establishing PMO at AstraZeneca

- Core Project Management Principles
- Agile Principles and Values
- Projects, Programs and Portfolios
- PMOs (Project Management Offices) Types and Functions
- 49 Project Management Processes – Overview
- Business Case and Benefits Plan
- Roles, Enterprise Environmental Factors (EEF) and Organisational Process Assets (OPA) Influences
- Predictive vs Agile Approaches

Waterfall Methodology – Construction Project

Case study: Township Project Construction By SLA Group

- Define project goals with clear Scope Statements
- Break down tasks using Work Breakdown Structures (WBS)
- Learn Project Scheduling essentials: CPM & compression techniques
- Plan and optimize resources effectively
- Build a reliable Schedule Baseline
- Manage changes with Scope, Schedule & Cost Control
- Apply Earned Value Management (EVM) for performance tracking
- Identify common project risks and issues
- Master risk response strategies: Avoid, Transfer, Mitigate, Accept
- Use tools like Risk Registers and Issue Logs
- Track ownership and resolution effectively
- Map and manage stakeholders using power-interest grids
- Navigate expectations, communication styles, and resistance
- Apply proven conflict resolution techniques
- Use escalation protocols and document outcomes clearly

Program curriculum

Agile Methodology – Technology Project

Case study: Digital Transformation of ILDC Bank

- Agile Frameworks: Scrum, Kanban, SAFe
- Project Selection and Agile Alignment
- Product Backlogs and User Stories
- Sprint Planning and Task Allocation
- Sprint Execution and Management
- Agile Metrics: Burndown, Velocity, Updates
- Reviews, Retrospectives and Iteration Adjustments

Hybrid Methodology – Smartphone Development Project

Case study: Smartphone Development

- Hybrid Project Management Basics
- Agile + Predictive Integration
- Managing Dependencies and Timelines
- Governance, Reporting and Milestones
- Agile Ceremonies vs Traditional Reviews
- Risk Techniques Across Methodologies

Lean Six Sigma – Process Improvement Project

Case study: Toyota Kirloskar's Lean Implementation in Manufacturing

- DMAIC Framework and Lean Principles
- Value Stream Mapping, Kaizen, JIT
- Root Cause Tools: Fishbone, Pareto, 5 Whys
- SIPOC, Control Charts and FMEA
- Defining Problems and Baselines
- Process Improvement
- Reporting Methods

Program curriculum

Workshop by KPMG in India: AI, Leadership & Strategy

- Building and Leading High-performing Teams
- Manage conflicts with emotional intelligence
- Use AI tools for smarter planning and scheduling
- Predictive Analytics and Data-driven Decisions
- Improve stakeholder communication with AI insights
- Track team performance through AI-driven dashboards
- Failure Analysis and Resilience Building
- Stakeholder Engagement
- Change Management

Disclaimer: The curriculum is subject to change at the mutual discretion of Imarticus Learning and KPMG In India. Any modifications made are intended to enhance the learning experience and ensure alignment with industry standards and requirements.

Case studies

Establishing PMO at AstraZeneca

When AstraZeneca partnered with Oxford to develop a COVID-19 vaccine, it faced immense pressure. A PMO was launched in just a week to manage contracts, streamline processes, and mitigate risk – leading to the successful delivery of 1B+ doses across 170 countries by July 2021.

Digital Transformation of ILDC Bank

ILDC Bank transformed from a traditional setup to a fully digital ecosystem, redefining customer experience for modern India. The case captures the strategy, execution, and innovation behind building a scalable, tech-driven retail banking model in a rapidly evolving digital landscape.

Township Project Construction by SLA Group

Learners manage the end-to-end construction of a 10-story residential complex using the Waterfall model. They define scope, plan costs, address risks, and apply EVM to monitor progress. The project ends with a handover, stakeholder review, and lessons learned.

Smartphone Development

IL Technologies' launching a new smartphone using a Hybrid Project Management approach. Hardware follows a Predictive model with fixed specs and timelines, while software runs on Agile with sprints, stand-ups, and user feedback. Integration checkpoints align both streams. The project wraps up with system testing, launch, and a post-launch review, emphasizing stakeholder communication, risk planning, and change management.

Toyota Kirloskar's Lean Implementation in Manufacturing

Learners apply Lean Six Sigma to real-world process optimisation at Toyota Kirloskar. They identify inefficiencies, analyse root causes, and implement sustainable improvements – enhancing productivity, reducing waste, and embedding a culture of continuous operational excellence.

Value-based Leadership

This case unpacks how visionary leaders embed values into performance and culture. It explores top-down and bottom-up innovation, stakeholder balance, and how founders instil purpose-led growth, creating organisations built on integrity, agility, and long-term value creation.
